IMPORTED PRODUCTS

In Competition with Our Own Is More Disastrons to Our Industries than Foreign Immigration

Why send American gold to buy of foreigners any product which our own farmers can sufficiently supply? Why import any foreign manufactures of which our own operatives can supply all we need? Our laws properly exclude Chinese laborers and we talk of restricting other foreign labor immigration in order to save our own industrious laboring people from the ruin of of the products of such foreign labor in competition with our own is even more disastrous to our industries than would be the presence here of the competing laborers. The imported products take from American citizens the labor of productives as fully as would imported foreign labor. With the laborers Lere they would make a market for some of our farm products and make a demand we import foreign wool we have that as perishable wealth, the foreigners have our gold in exchange, imperishable wealth. When we produce the wool here we have the wool and the gold both and a presperous people besides. Our people should have American wages and the whole American market for their products.

LABOR AND CAPITAL.

The Former Receives the Greater Portion of Benefits Under a Protective Policy. In 1860, under the free-trade policy, \$785 of capital and \$790 worth of raw material gave employment to one hand who produced \$1,438 in finished goods. The value of products over cost of material was \$656. Of this sum labor received \$280, or about 44% per cent., while capital had \$360, or about 55% per cent. for expenses and profits.

In 1800, under the protective policy, it require 1 \$1,385 of capital and \$1,095 in raw material for each hand employed. The finished product amounted to \$1.- hended. uss, or ssociabline cost of material. Of this amount labor received \$485, or about 51 per cent., while capital has \$408, or about 45% per cent., reversing in the interest of labor the division of net products.

While the capital required to keer one hand employed had to be increased 76 per cent, from 1860 under a-free trade policy to 1890 under protection, and the needed raw material was over one-third greater, the product of labor was only increased as per cent. The increase in earnings over the cost of material was \$343 per hand. Of this increase labo received in increased wages \$196, whill capital only received \$17 as its share of this gain. It will thus be seen that labor has secured the greater portion of the benefits of improved machinery

Protection the Best Ining for All the Country.

We are glad to see the Daily Picayone, of New Orleans, spreading the detrine of protection through an interview held by one of its reporters with Cd. Reid Northrop, president of the American Transit and Refrigerator Company, with headquarters at St Louis, as follows:

Col. Northrop below position to speak intel-legen by as research the results of the parish bill open the general provincial of perishables, and which seem recently gave the reporter a very "It is remarkable, he said, the effect pro-disced upon the movement of botter and edgs, for instance. I have noticed that the bulk of the novement in this particular from the western country has been diministed almost half, rain is a very seriods now to our business. The western country wants protection. Pro-

"Tariff Reform."

W. Long

This is Truly Shocking. We are continually being bidden to expect all manner of good things from democratic government. In fact, the ferin "democratic" is so perpetually on truly shocking. - The Nottingham, England, Guardian.

In the fiscal year 1893 our exports of raw cotton were 4,401, 524 bales, or 2. 204,131,711 pounds, of the value of \$187,of 2.6-9, or 8.484 cents per pound. In the same year the imports for consumption were of raw cotton 43,330,286 pounds of the custom house value of \$4,686,439, manufactured cotton goods of the custom house value of \$19,031,638, of flax and its manufactures, \$39,679,240. All these Soreign products should have been excluded by a tariff sufficiently protective for the purpose; all the needed cotton and flax and manufactures of both should have been produced in our

own country. A DECREASE of \$34,000,000 in the circulation of money in the United States between September 1, 1893, and September 1, 1894, a decrease of 50 cents for every man, woman and child in the Abenefit is always experienced from the This, under a democratic and free-trade administration. Is it possi-ble? We would never believe it if the ignres were not given out by a demo-eratic secretary of the treasury. Senator Jones will knew who depreciates

the money circulation of the country. A pusue, of wheat bought twenty points of a gar under McKinley protection. It bays only ten pounds of sagar under the first step toward free-trade. Here will it buy with the absolute free-trade that is promised to the farmer?

the farmer

THE NAPOLEON REVIVAL

Why the Emperor Is the Most Popular Character in History.

Within the past year there has been a revival of interest in the career of Napoleon Bonaparte that is almost phenomenal. In literature he has figured in the pages of memoirs and reminiscences by those who came into more and less intimate contact with him. In art not only has he been a potent inspiration to modern painters and sculptors, but he has made priceless all pictorial records of his time. In allen competition But the importation the drama he poses as the most picturesque figure that has been brought upon the stage within the century. Personal relies of the man are held as sacred and beyond all price. As Paul Bourget aptly says, "Napoleon has hypnotized the French people again." In France the sting of defeat after the Franco-Prussian war turned the thoughts of all to their period of greatest glory, and so it needed but time to for homes in which to reside. When see Napoleon enshrined as an idol. An equally logical explanation is found for the most notable feature of the Napoleon revival in this country. The Century's life of the emperor was

projected five or six years ago, before anyone could have foreseen the present attitude of the public mind. It was undertaken solely with the idea that Napoleon was one of the greatest, most forceful and picturesque characters in the entire range of history, and that hitherto he had been inadequately represented. For that reason Prof. William M. Sloane, the greatest Amer-Ican student of French history, was commissioned to write the life, and his years of study among unpublished archives have brought out his completed labor at the most opportune moment. And Prof. Sloane shows us a new Napoleon, a devourer of books, an unsuccessful literary asptrant, an ineffeetual Corsican political agitator, but

of all cases of consumption can, if taken in the earlier stages of the disease, be cured.

LOUISVILLE. WHEAT-No. 2 Rest.

FORK New Me

DOTTON-Middling.

This may seem like a bold assertion to those familiar only with the means generally in use for its treatment; as, nasty cod-liver oil and its fithy emulsions, extract of malt, whiskey, different preparations of hypophosphites and such like palliatives.
Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every ease, but a large fercentage of cases, and we believe, fully 98 per cent, are cured by Dr. Pierce's Golden to then indeed as I see the matter, is the best Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by Golden Medical Discovery "were genuine cases of that dread and fatal discase? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians. who have no interest whatever in mis-representing them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty codliver oil and its fifthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, term "democratic" is so perpetually on the tangues of political spouters that phites had also been faithfully tried in vain it is getting sinkening. But here is a democratic United States government which has existed for over a hundred years, presenting to the world a spectacle of selfishness and corruption that is pages which will be mailed to you, on region of a large number of those cured of consumption, bronchitis lingering coughs, asthma, chronic nasal attarth and kindred maladics, have been skillfully reproduced in a book of no pages which will be mailed to you, on region of address and six cents in stamps. ceipt of address and six cents in stamps. You can then write those cuted and learn their experience.

Address for Book, World's Dispensary Medical Association, Buffalo, N. Y.

The Greatest Medical Discovery of the Age.

KENNEDY'S MEDICAL DISCOVERY

DONALD KENNEDY, of ROXBURY, MASS. Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder bumor). He has now in his possession over two hundred certificates

first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a

time. Sold by all Druggists.

Highest of all in Leavening Power.- Latest U.S. Gov't Report
